To whom it may concern,

I have the honor to recommend Denys Bushuliak in the light of his impressive achievements and capabilities in software development.

Throughout our collaboration at Safe Frontier, I have had the opportunity to witness Denys's professional growth. He has demonstrated remarkable abilities in planning and developing complex full stack applications. Through his work and adherence to best practices such as Test-Driven Development and system decomposition, the company has achieved significant improvement in software development life cycle and product quality.

Particularly noteworthy is his ability to independently solve problems in various and new domains. He has shown responsibility in developing complex systems such as CMS, knowledge base system, mail server, client SDK, backend mobile device management system, invoicing and billing system, contextual help system, and managed task scheduling system.

It is important to highlight that this entire set of systems was integrated into the company's product line, which emphasizes the responsibility for the quality of implementation and performance. Additionally, Denys implemented significant improvements of the security policy execution engine, enabling the company to achieve even higher levels of productivity and efficiency.

I can confidently say that Denys is a valuable asset to any project or company. His talent, professionalism, and ability to deliver results make him a reliable colleague.

I recommend Denys Bushuliak without any reservations and with great enthusiasm, and I am confident that he will be an additional asset to your team.

Sincerely,

Andrii Bardachenko
CTO
